

FEEL AN EARTHQUAKE?

DEL NORTE COUNTY EXPERIENCES TWO TYPES OF TSUNAMIS:

LOCAL

A local tsunami can begin within minutes of an earthquake, and the only warning might be the ground shaking. If you are near the ocean, walk quickly inland or to high ground once the shaking stops.

DO NOT WAIT FOR A WARNING!

DISTANT

A distant tsunami is caused by a large earthquake across the ocean. These take time to arrive and allow more time to evacuate. Follow the instructions of local emergency officials.

DO NOT RETURN UNTIL OFFICIALS SAY IT IS SAFE.
